GLM-OUTDOOR.COM

Discover GLM's aluminium carports, a sleek alternative to traditional garages.

These robust pergola structures seamlessly blend elegance with functionality, providing reliable vehicle protection and enhancing your property's aesthetic appeal.

Choose from single or double typologies with customisable add-ons such as LED lighting and fabric ceiling. With minimal maintenance and efficient drainage systems, GLM's carports redefine stylish and durable vehicle shelters, adding both value and charm to your property.

Elevate your outdoor experience further by exploring our carports with integrated photovoltaic roofs, transforming these structures into eco-friendly solutions that offer vehicle protection while harnessing solar energy.

GLM's aluminium carport is a sustainable and robust solution that adheres to strict construction criteria, designed for durability and efficiency. It accommodates the integration of PV cells, meeting high snow load standards. This maintenance-free alternative to traditional garages is a smart investment, adding value and revenue to your property while providing a stylish and practical shelter for your vehicle.

Introducing a fusion of cutting-edge design and functionality, the standard version boasts integrated photovoltaic panels with customizable roof components like plain aluminium panels or polycarbonate sheets. Available in both single and double options, the carport can be further enhanced with features such as LED lighting, fabric ceilings, and vertical parapets.

Carport

driving towards a sustainable future with innovative parking solutions

- Fully sustainable solutions that comply with strict construction standards and regulations
- Very robust constructions enabling the integration of PV Cells, while meeting high snow load standards up to 170 Kg/sqm.
- Maintenance-free and durable alternative to traditional garages, eliminating the need for regular treatment or upkeep.
- A smart investment that adds value and revenue to your property, offering a stylish and practical shelter for your vehicle.
- Available in single and double typologies, for one or two vehicles respectively.
- The standard version includes integrated photovoltaic panels, while alternative roof components such as plain aluminium panels or polycarbonate sheets are also available.
- The construction can be enhanced with LED lighting, aluminium ceiling and vertical parapets.
- Efficient sealing and drainage system as in bioclimatic pergolas.
- Front posts can be adjusted (0.7 - 1.0 m offset) for improved maneuverability.
