

Fences & Gates

Unlimited design solutions

Three series and vast profile selection cover a wide variety of typologies and technical solutions, and simultaneously offer unlimited decorative proposals with different patterns, materials, colors, lighting solutions, etc.

Very large dimensions

One of the differentiating features of these systems is their oversizing capabilities. Total fencing height and distance between consecutive posts more than 2.0m, gate spans up to 6.0m, both in cases of sliding and hinged gates, etc.

Unmatched aesthetics

Detailed design, aluminium posts instead of concrete ones, concealed fixing points, special caps, variety of materials and lighting options, etc. All these together are a guarantee for high aesthetical value.

FC10

FC10 is a unique series, with its louvers mounted vertically, offering a special minimal result. With a wide range of aluminium and Woodalux louvers, placed separately or combined, the series offers exceptional design proposals.

FC60

FC60 has its louvers horizontally attached on the posts, mostly on the external side, while creating a totally linear design around your space. Gate solutions are all included.

FC80

FC80 provides a more classical design with its louvers placed between the posts, with or without spacing between louvers. At the same time, it offers a vast variety of profiles, allowing the creation of countless designs and covering most technical solutions, whether special or not.

The fencing solutions with **FC10**, a system that is characterised by these vertical lines and consequently by absolutely minimal aesthetics.

At the same time, this system can successfully replace the similar linear steel constructions, without coating, corrosion and maintenance issues that accompany the latter..

Advantages

- Particular style, not commonly met in fences made of aluminium.
- Spectacular final result when combined with profiles.
- It effectively replaces the respective steel constructions.
- Long fencing constructions without stability and wind-load problems.
- Smart and effective way of louvers connection - especially on the top side - which remains unnoticed.

FC10 incorporates several technical characteristics and when combined with other systems, it covers a wide range of solutions and applications, while remaining aesthetically incomparable, and performing effectively at all levels.

- The support of louvers at the bottom is achieved by using a specially designed aluminium rail (railing), having the fixing points of louvers concealed.
- The support on the upper side is achieved either by handrail with LED light option, or by specially designed caps that keep the support unnoticed.
- For sliding or hinged gate solutions, FC10 louvers are combined with FC80 profiles.

FC60 is a complete aluminium fencing system with louvers of your selection horizontally attached on the posts.

It offers a continuous, minimal and aesthetically linear result. A fencing system that can upgrade the style of your place and is fully recommended for hotels, residences, maisonettes, etc.

It offers all gate options (hinged, sliding) and is characterised by high durability and large construction dimensions.

Advantages

- Excellent minimal design / linear aesthetics, without visible fixing points.
- Wide range of solutions and designing options, especially in aluminium louvers.
- Unique combinations with wood composite materials, such as the hybrid louvers.
- Great robustness and possibility for large spans.

Technical Details

FC60 effectively combines various materials and technical features, and hence, offers complete fencing solutions for a wide set of corresponding needs. Reinforced mullions, robust gates, wide range of aluminium louvers and other materials constitute this series, which incorporates linear aesthetics with high performance.

- Aluminium post in “T” shape, with simple or perimetrical caps and concealed fixing points.
- Special design for inserting anchor bolts, in various lengths and with rustfree protection.
- Sliding and hinged gate options.
- Louver ending with special profiles or alternatively, with aluminium or plastic caps

FC80 is a fencing system that comes in diverse forms and configurations.

It offers a vast variety of applicable solutions. It can be a valuable tool for every architect, part of every fencing project and unique answer to various demands. The main system features are the inlaid, inserting style installation of the infills between the posts and the vast range of the decorative materials applied.

Additionally, the system stands out for its incomparable durability - reinforced profiles and heavy-duty accessories – that helps in allowing wider distance between posts and creating very large privacy fences and gates.

Advantages

- Top levels of robustness for large scale constructions, especially gates that make vehicle passing much easier
- Top levels of robustness for large scale constructions, especially gates that make vehicle passing much easier
- Wide range of solutions and high level of customization, thanks to the plethora of profiles and technical solutions

Technical Details

Every technical need can be covered with a wide range of mullions in different sizes and styles that, contrary to common concrete and aluminum posts, can achieve:

- Construction oversizing
- Cooperation with hinged panels, up to 3.0m
- Post to post span beyond 2.0m
- Excellent and long-lasting functionality
- Unlimited customised solutions, looking much better with aluminium rather than concrete profiles

250x250mm mullion, i.e., steel or concrete body surrounded with aluminium profiles.

Minimal mullions (i.e., half), 40x80mm and 40x120mm, for framing upon an existing post.

Top quality, unlimited color options.

Fences are usually exposed to various corrosive conditions (weather, coastal areas, etc.), thus, GLM, as a pioneering company, combines the extremely durable Seaside Class coating with the special surface treatment of pre-anodizing and noticeably reduces “filiform” corrosion.

Pre-anodizing, the real anti-corrosion protection.

Combine pre-anodizing with unlimited colors, creating long lasting architectural solutions of unparalleled style and quality.

Single and double-leaf gate

- with 250mm and 120mm posts
- fence with aluminium profile and (35x80mm)

Section

Details

Sliding and single-leaf gate

- with "barcode" style louver and 120mm posts
- fence with "Z" shape louver

Section

Details

FC 10 / 1001

■ 1001 - D

Louver BARCODE M8423

FC 10 / 1003A

■ 1003 - D

Louver M8425 (up to 1200mm height) or 35x80 M8371 (from 1201mm height), 90mm spacing and 45-degree angle for gate

FC 10 / 1003B

■ 1003 - D

Louver 33x88 M8372 (63mm pitch and 135-degree angle)

FC 10 / 1032

■ 10032 - D

Louver 20x30 SR-20x30x1.3, 100mm pitch

Single-leaf hinged gate

- with fixed parts, and with fence in existing cement blocks

Section

Details

Double-leaf hinged gate

- supported by cement blocks concealed by aluminium 250mm
- with single-leaf hinged gate and fence (everything in aluminium)

Section

Details

FC 60 / 6001

■ 6001 - D

Louver 20x40 with 20mm gap

FC 60 / 6008

■ 6008 - D

Louver 20x80 with 30mm gap

FC 60 / 6003

■ 6003 - D

Louver 20x40 + 20x80 with 30mm gap

FC 60 / 6014

■ 6014 - D

Louver 14x140 with 30mm gap

Single-leaf hinged gate

- with fence and existing concrete post
- half aluminium mullion 40x80mm, simple adjoining profile

Section

Details

Sliding gate

- supported by 120mm aluminium mullion (not cement blocks)
- with single-leaf hinged gate and fence (everything in aluminium)

Section

Details

Double-leaf hinged gate

- supported by cement blocks covered with 250mm aluminium sides
- with single-leaf hinged gate and corresponding fence
